

ADHS

Moderna COVID-19 Vaccine Orders WILL OPEN

Monday 5/3/2021

for ALL Onboarded COVID-19 Pandemic Providers

As vaccine supply increases, starting in May 2021 the COVID-19 vaccine ordering process will begin to shift to the Arizona State Immunization Information System (ASIS). The transition to ASIS ordering is expected to allow ADHS onboarded and eligible providers to be able to order COVID-19 vaccine based on demand. To ensure vaccine equity, priority for ordering will initially be provided to state and local allocators to implement strategies to improve vaccine uptake among hesitant and underserved populations.

Starting May 3, Moderna vaccine ordering will be available in ASIS with an initial ordering cap of 200 doses per order (**one order per two week period unless a special event is indicated in the notes in ASIS**). Pfizer and Janssen (J&J) vaccines are expected to be allocated by state and local health departments while supplies remain limited.

Providers can learn more about ADHS provider onboarding and ASIS ordering in [AIPO Train](#).
